

Heating System Rebates for Existing Homes

Minnesota Energy Resources' **Heating System Rebates** provide incentives to customers who **upgrade to a high efficiency** natural gas furnace or boiler, install a programmable or advanced thermostat or upgrade their gas hearth/fireplace. Not only will you save on your upgraded system, but you'll continue to save with reduced natural gas use year after year. We recommend that you work with a heating dealer of your choice to determine the best system for your home.

After the qualifying system is installed, work with your contractor to complete and submit a **Heating System Rebate application**. Funding is limited and can change or end at any time. Applications will be processed on a first-come, first-served basis. The program application must be received within 60 days of installation.

For additional questions or to download an application, please visit minnesotaenergyresources.com or call us at **866-872-0052, option 1**.

Rebates and Minimum Efficiency Requirements

Measure	Minimum Efficiency	Rebate
Natural Gas Furnace	92% AFUE ¹	\$250
Natural Gas Furnace	95% AFUE ¹	\$350
Natural Gas Furnace	97% AFUE ¹	\$500
Natural Gas Furnace for Mobile Homes	92% AFUE ¹	\$200
Natural Gas Boiler	90% AFUE ¹	\$200
Integrated Natural Gas Space and Water Heating System	92% AFUE ¹	\$250
Electronic Programmable Setback Thermostat		\$25*
Advanced Thermostat	Automatic Programming	\$100*
Natural Gas Hearth/ Fireplace	Direct vent, sealed combustion, electronic ignition fireplace, insert or free-standing stove	\$75

The Air Conditioning, Heating and Refrigeration Institute (AHRI) will be used to determine the AFUE, EF and CAE for heating purposes. Please reference all of the rebate requirements prior to installation in order to ensure eligibility.

¹ AFUE: Annual Fuel Utilization Efficiency

* Rebate amount is 50% of total improvement cost, up to maximum rebate amount listed above.
